REPORT OF PRINCIPAL AND SCHOOL IMPROVEMENT COUNCIL

While the 2007-08 school year has been a productive year for the students and staff at Ware Shoals Jr/Sr High School, we are currently looking towards the future with two new initiatives that have a proven track record of success. The first is implementation of the Southern Regional Education Board's High Schools That Work, a reform model supported by the state department of education. The second is exploration of the possibility of offering single gender classes for students in the junior high school who may be more successful in a same sex classroom.

The Southern Regional Education Board's High Schools That Work is the nation's largest and fastest-growing effort to combine challenging academic courses and modern vocational studies to raise the achievement of high school students. Member schools implement 10 Key Practices for changing what is expected of students, what they are taught and how they are taught. In June the leadership team of Ware Shoals Jr/Sr High School will attend a week long High Schools That Work new site professional development training at the 2008 South Carolina Education and Business Summit. In July, a four member district and school administrative team will attend the 22nd Annual HSTW Staff Development Conference to further training in this important school reform initiative.

For students in the Darby Building, we are considering implementing one of the current trends in education, single gender classes. These classes are becoming extremely popular throughout the state and country. Anecdotal evidence from schools indicates that girls in all girl classes tend to participate more readily and more often. Boys are less likely to "show out" when they have no girls to impress. The real key to success, however, comes when teachers receive training in brain research and in differences in learning styles between girls and boys and are able to apply these strategies in the classroom. With these two exciting initiatives and other innovative ideas, the faculty and staff are working towards our mission of providing a safe, nurturing, and challenging environment that meets the unique needs of our students while preparing them to be respectful, productive, and responsible members of society.
